

Corporate Valuation: Techniques & Applications

The course covers various methodologies used for business valuation, the process of valuation exercise and its importance and implications on strategic decision making. This course will have a mix of practical topics relevant to the current business environment. The course has been designed to build the financial confidence of individuals and enable them to carry out corporate valuation exercises independently as part of their daily responsibilities.

Overview

The Course will provide participants with a structured process and methodology to analyze and understand financial information and help them improve their valuation skills. The course is designed to ensure that complex concepts are delivered to participants in a simple way and make it easier for them to remember and apply these concepts in their current job and business decision-making.
