Advanced Financial Modelling – Level 1

16-18 December 2024
Denpasar, Bali

Get prepared for the level 1 of the Advanced Financial Modeller (AFM) certification examination with our detailed online exam prep course. The rigorous course equips you with practical and hands-on experience to design your own financial model. Our course offers a step-by-step and in-depth knowledge on the use of Excel tools and techniques, thereby enabling the participants to gain an understanding on the best financial modelling techniques. The trainees will also gain a thorough understanding for constructing dynamic and interactive financial models, which meet the greatest industry standards.

Overview

The skills related to financial modelling and analysis are the most sought-after skills in the business arena and most desired by employers. The intensive course helps you to effectively prepare for the level 1 of the AFM certification examination.

On completion of the course, you will be able to:

- Gain an understanding about the concepts and methods in financial modelling;
- Improve and upgrade your skills;
- Be a part of a bigger team to offer assistance for improving projects or work on new assignments;
- Significantly use Excel in your routine work, thereby enabling you to make concrete financial decisions.

Who should attend

All individuals who want to improve their financial modeling skills should attend this course

- Middle to senior managers from different industries
- All professionals who want to deal or currently deal with financial modeling in their company
- Consultants, advisors and other professionals who wish to improve their modeling skills

Methodology

The non-theoretical methodology which includes interactive discussions, case studies, and assignments to understand the concepts and their applicability. As a policy, we limit the class size so that we can provide attention to each participant and ensure their objective is achieved. We request you to please bring your laptop with Microsoft Excel installed to the class.

Trainer

All our trainers are carefully chosen by us and possess a rich and vast experience in the financial sector. This course conducted by an experienced training consultant having more than 16 years of industry experience with some of the world's leading business institutions, specializing in corporate finance, investment banking, and private equity.

Advanced Financial Modelling – Level 1

16-18 December 2024
Denpasar, Bali

About AFM Programme

Candidates who have intentions of earning the AFM certification - level 1 from the Financial Modeling Institute (FMI) should take up this course. The AFM programme is ideal for anyone who has a flair for finance or is working in the field of finance. Both finance students as well as experienced industry professionals can opt for the AFM certification programme.

The FMI examination

FMI provides a global financial modelling certification, which consists of three levels. The structure of the FMI certification is similar to that of the CFA certification scheme. The FMI examination is conducted online twice every year in April and October for which you should register directly with the institute. The duration of the examination is 4 hours. Riverstone Training is one of the few training institutes that are approved by FMI for offering a prep course for the first two levels. For taking up this course, it is not mandatory that you are registered or are appearing for the FMI examination. The course will help you to prepare for the FMI examination; however, attending this course will not guarantee your results in the examination.

Software required

Microsoft Excel is essential for taking up this course. The preferred version is Excel 365; however, the candidates can use any Excel version as per their preference, including a Mac version.

Topics that need to be covered for the level 1 AFM certification

In the 4-hour exam, students should finish a variety of tricky questions from accounting basics, such as:

1. financial statement construction and linkages;
2. financial model layout and best practices;
3. intermediate-to-advanced Microsoft Excel skills/keyboard shortcuts;
4. scenario analysis;
5. model schedules (eg., working capital, fixed vs. variable costs, debt and equity, deferred taxes).
