Effective Operational Risk Management

15 - 17 July 2024

Kuala Lumpur

This interactive workshop course is apt for participants working as and with operational risk management personnel in financial and non financial institutions and need to keep pace with developments in the risk discipline amidst growing pressures of regulatory, governance and compliance issues as well as very intensifying digital disruptions to the traditional business models and operational processes. It engages the participants in examining the challenges and issues of operational risk management and drives forth the case for managing operational risks with a proper risk culture and framework is imperative to profitability and above all, survival of the enterprise

Overview

Operational Risks span across not just the financial spaces but also the non financial spaces. This three- day interactive workshop initiates and fortifies business professionals, from both financial and non financial institutions, in the practical issues and challenges in operational risk management.

Today's business entity comes face to face with disruptive forces such as exponential technology (ET), digitization, cloud computing, big data, block chain technology, fintech and escalating cyber security concerns. Peppered with infamous operational "accidents" (including the massive cyber hacks at Equifax, United Airlines' crisis mismanagement, beaching of the "London Whale", LieBor, SocGen Kriewel...) and drawing from the evolving demands from regulatory changes and industry best practices including Basel, ISO and COSO, this session provides a timely address to operational risk matters.

Intended to be edu-training, it examines the operational risk management practice with less quantification, more qualitative rationalization and applies a palatable lay and case-based approach to an otherwise heavily technical subject

Upon completion of this course, the participant will

- Have a proper understanding of different operational risk events especially cyber security, reputational and regulatory/compliance risks
- Appreciate the impact operational risks have on financial and non financial institutions
- Develop a practical approach to measuring, assessing and managing operational risk
- Recognize the challenges posed in the process of managing operational risks, particularly in the face of heightening regulatory and industry demands including ISO, COSO, Basel, UCIT and MiFid
- Draw lessons from the various operational mishaps

Who should attend

All individuals who want to improve their value-adding effectiveness to the operational risk management function

- CEOs, head of business units, advisors and business consultants
- Managers from financial institutions like banks, NBFIs, insurance, asset management companies
- Non-finance professionals from sales, marketing, human resources, operations, investor relations, production, legal departments etc to understand the operational risk management discipline

Effective Operational Risk Management

15 - 17 July 2024

Kuala Lumpur

- Any other professional who is committed to the drive for better (and value add) operational risk management

Methodology

Non-theoretical methodology which includes interactive discussions, case studies, interactive games and assignments to understand the concepts and their applicability
