Real Estate Modelling and Analysis

14 - 16 April 2025

Singapore

The course equips you with a comprehension on the various concepts and practices in the real estate sector. Our course also offers in-depth knowledge of the financial protocols relevant to the real estate market. Consequently, the participants will be equipped with the know-how to formulate advanced and effective real estate financial models independently.

Overview

The course will explain the key concepts and metrics involved in the cash flow of real estate. The course is designed to ensure that the participants get thorough insights on whether to own or rent a real estate possession and make practical decisions regarding financing and investing in the real estate field. Furthermore, the course also highlights the role of private equity in commercial real estate.

Who should attend

Anyone who wants to enhance their expertise in Real Estate modeling and analysis should attend this course, which includes:

- Middle to senior managers from different industries
- All professionals who want to deal or currently deal with financial modeling in their company
- Consultants, advisors, and other professionals who wish to improve their modeling skills

Methodology

The nontheoretical methodology includes interactive discussions, case studies, interactive games, and assignments to understand the concepts and their applicability.

Trainer

We carefully choose all our trainers with rich and vast experience in the financial sector. The course will be conducted by an experienced training consultant having more than 20 years of industry experience with some of the world's leading financial institutions, specializing in corporate finance, investment banking, corporate fundraising, company valuation, and asset valuation.
